

Manufacturer Information

Concerning software revisions and supported devices

1 General description

Manufacturer	: Endress+Hauser Process Solutions AG
Product	: FieldCare SFE500
Content	: FieldCare Package 1.37.00

2 Software revisions

FieldCare Package 1.37.00 mainly contains:

FieldCare 2.15.01 - New version

- New, robust USB-Stick (USB-A and USB-C) is now the physical media for the FieldCare package, delivered with a secure shipment process. Delivery on DVD is no longer offered. A download via the Endress Hauser software portal is still possible: <https://software-products.endress.com>
- Comfort access to execute a Heartbeat Flow Verification
- Higher performance up to 20x (catalog, topology, adding devices, ...)
- Support of Turck IO-Link Master for point-to-network access of IO-Link field devices from a central Plant Asset Management station
- Increased security and vulnerability hotfixes (we recommend an update to FieldCare 2.15.01)
- Updated device identification information for clear user guidance of new devices
- New Software License Management (online/offline) for easy and transparent software license administration
- New FieldCare application update is from now on automatically detected and can be, if wanted, downloaded and installed (valid software update service is needed)

3 Supported devices and changes concerning previous versions

Please find detailed information here:

- Getting Started
- Technical Information and Operating Instruction
- Release notes of each individual component
- Device lists

All information is available in the FieldCare Package.
