Technical Information

Orbipore CPS91 and CPS91D

pH electrodes, analog or with digital Memosens technology
With open aperture for heavily soiled media, optional built-in temperature sensor

Application
- Chemical processes
- Pulp and paper industry
- Heavily soiled media:
  - Solids
  - Emulsions
  - Precipitation

With ATEX, FM and CSA approval for application in hazardous areas

Your benefits
- Open aperture for application in heavily soiled media
- Built-in temperature sensor for effective temperature compensation (optional)
- Low maintenance thanks to gel filling
- Long service life thanks to new stabilized gel
- Extremely insensitive to pressure and temperature variation
- Short response time
- Poison-resistant reference with ion trap (optional, CPS91D only)

Further benefits offered by Memosens technology
- Maximum process safety through contactless inductive signal transmission
- Data safety through digital data transmission
- Easy handling thanks to storage of sensor-specific data in the sensor
- Predictive maintenance possible thanks to registration of sensor load data in the sensor
### Function and system design

#### Measuring principle

**pH measurement**

The pH value is used as a unit of measurement for the acidity or alkalinity of a liquid medium. The membrane glass of the electrode supplies an electrochemical potential which is dependent upon the pH value of the medium. This potential is generated by the selective penetration of H⁺ ions through the outer layer of the membrane. An electrochemical boundary layer with an electric potential forms at this point. An integrated Ag/AgCl reference system serves as reference electrode.

The transmitter converts the measured voltage into the corresponding pH value using the Nernst equation.

#### General properties

- **Open aperture**
  
  Thanks to its open aperture, the electrode is particularly suitable for application in heavily soiled media.

- **Temperature compensation**
  
  Depending on the ordered version, a Pt 100, Pt 1000 or NTC temperature sensor is integrated in the electrode to measure the medium temperature.

- **Durability**
  
  The electrode is pressure-proof up to 13 bar (188.5 psi) and can be applied with temperatures of up to 110°C (230°F).

#### Important properties of CPS91D

**Maximum process safety**

The inductive and non-contacting measured value transmission of Memosens guarantees maximum process safety and offers the following benefits:

- All problems caused by moisture are eliminated.
  - The plug-in connection is free from corrosion.
  - Measured value distortion from moisture is not possible.
  - The plug-in system can even be connected under water.

- The transmitter is galvanically decoupled from the medium. The result: No more need to ask about "symmetrically high-impedance" or "unsymmetrical" (for pH/ORP measurement) or an impedance converter.

- EMC safety is guaranteed by screening measures for the digital measured value transmission.

- Application in explosion-hazardous areas is unproblematic; the integrated electronics are intrinsically safe.

**Data safety through digital data transfer**

The Memosens technology digitalizes the measured values in the sensor and transfers them to the transmitter contactlessly and free from interference potential. The result:

- An automatic error message is generated if the sensor fails or the connection between sensor and transmitter is interrupted.
- The availability of the measuring point is dramatically increased by immediate error detection.

**Easy handling**

Sensors with Memosens technology have integrated electronics that allow for saving calibration data and further information such as total hours of operation and operating hours under extreme measuring conditions. When the sensor is mounted, the calibration data are automatically transferred to the transmitter and used to calculate the current measured value. Storing the calibration data in the sensor allows for calibration away from the measuring point. The result:

- Sensors can be calibrated under optimum external conditions in the measuring lab. Wind and weather do not affect the calibration quality or the operator.
- The measuring point availability is dramatically increased by the quick and easy replacement of precalibrated sensors.
- The transmitter does not need to be installed close to the measuring point but can be placed in the control room.
- Maintenance intervals can be defined based on all stored sensor load and calibration data and predictive maintenance is possible.
- The sensor history can be documented on external data carriers and evaluation programs at any time. Thus, the current application of the sensors can be made dependent on their previous history.

**Communication with the transmitter**

Always connect digital sensors to a transmitter with Memosens technology. Data transmission to a transmitter for analog sensors is not possible.
Data storage of CPS91D

Digital sensors are able to store the following system data in the sensor.

- **Manufacturing data**
  - Serial number
  - Order code
  - Date of manufacture

- **Calibration data**
  - Calibration date
  - Calibrated slope at 25°C (77°F)
  - Calibrated zero point at 25°C (77°F)
  - Temperature offset
  - Number of calibrations
  - Serial number of the transmitter used for the last calibration

- **Application data**
  - Temperature application range
  - pH application range
  - Date of first commissioning
  - Maximum temperature value
  - Operating hours at temperatures above 80°C (176°F) and 100°C (212°F)
  - Operating hours at very low and very high pH values (Nernst voltage below -300 mV, above +300 mV)
  - Number of sterilizations
  - Glass membrane impedance

These system data can be displayed with Mycom S and Liquiline M transmitters.

Measuring system

A complete measuring system comprises:

- CPS91 pH electrode or CPS91D digital sensor
- Transmitter, e.g. Liquiline M CM42 (with Memosens technology for CPS91D)
- Special measuring cable, e.g. CPK9 or Memosens data cable CYK10 for CPS91D
- Immersion, flow or retractable assembly, e.g. Cleanfit P CPA472

![Measuring system for pH measurement](image-url)

1. Cleanfit P CPA472 retractable assembly
2. CPS91D electrode
3. CYK10 Memosens data cable for digital sensors
4. Liquiline M CM42 transmitter
**Input**

**Measured variables**
- pH value
- Temperature

**Measuring range**
- 0 to 14 pH
- 0 to 110°C (32 to 230°F)

*Caution!*
Please note the process operating conditions.

**Installation**

**Installation instructions**
Do not install the electrode upside down. The inclination angle must be at least 15° from the horizontal. A smaller inclination angle is not permitted as such an inclination results in air cushion forming in the glass sphere. This might impair full wetting of the pH membrane with inner electrolyte.

*Caution!*
- Make sure that the assembly’s threaded connection for the electrode is clean and well running before installing the electrode.
- Hand tighten the electrode (3 Nm / 2.2 lbf ft)! (Given value only applies to installation in Endress+Hauser assemblies.)
- Make sure to follow the installation instructions in the operating instructions of the used assembly.

![Electrode installation; inclination angle min. 15° from the horizontal](image)

A Permitted inclination angle  
B Non-permitted inclination angle

**Environment**

**Ambient temperature**

*Caution!*
- **Danger of frost damage**
- Do not operate the sensor at temperatures below –15°C (5°F).

**Storage temperature**
- 0 to 50°C (32 to 122°F)

**Ingress protection**
- IP 67 (NEMA 4X) with GSA plug-in head (with closed plug-in connection)
- IP 68 (NEMA 6) with TOP68 plug-in head (1 m / 3.3 ft) water column, 50°C (122°F), 168 h
- IP 68 (NEMA 6) with Memosens plug-in head (10 m / 33 ft) water column, 25°C (77°F), 45 days, 1 M KCl
**Process**

**Process temperature**
0 to 110°C (32 to 230°F)

**Process pressure**
0 to 13 bar (0 to 188.5 psi)

**Pressure-temperature load curve**

![Pressure-temperature load curve](image)

A Application range of CPS91/CPS91D

**Conductivity**
min. 500 μS/cm

**pH range**
0 to 14 pH

Caution!
Danger of damage to the electrode
Do not operate the electrode in applications outside the given specifications!
Mechanical construction

Design, dimensions CPS91

CPS91 with ESA plug-in head, temperature sensor

1 TOP68 plug-in head, Pg 13.5
2 Viton O-ring with thrust collar
3 Ag/AgCl metal lead - reference chamber
4 Bridge electrolyte
5 Ag/AgCl metal lead - pH
6 Compensator
7 Open aperture
8 pH membrane
9 Temperature sensor

CPS91 with GSA plug-in head

1 GSA plug-in head, Pg 13.5
2 Viton O-ring with thrust collar
3 Ag/AgCl metal lead - reference chamber
4 Bridge electrolyte
5 Ag/AgCl metal lead - pH
6 Compensator
7 Open aperture
8 pH membrane
Design, dimensions CPS91D

![Diagram of CPS91D with Memosens plug-in head, temperature sensor](image)

9. Temperature sensor

Weight
- approx. 0.1 kg (0.22 lbs)

Materials
- Electrode shaft: glass, suitable for processes
- pH membrane glass: type B
- Metal lead: Ag/AgCl
- Diaphragm: open aperture

Process connection
- Pg 13.5

Temperature sensor
- CPS91: Pt 100, Pt 1000
- CPS91D: NTC

Plug-in heads
- CPS91:
  - ESA: plug-in head Pg 13.5, TOP 68 for electrodes with or without temperature sensor, 16 bar (232 psi) triple safety overpressure, Ex
  - GSA: plug-in head Pg 13.5 for electrodes without temperature sensor
- CPS91D:
  - Memosens for digital, contactless data transmission

Reference system
- CPS91: Ag/AgCl metal lead with reference electrolyte
- CPS91D:
  - Version BO: Ag/AgCl metal lead with reference electrolyte
  - Version BT: Ag/AgCl metal lead with ion trap

Endress+Hauser
Certificates and approvals

Ex approval

CPS91 (TOP68)
- ATEX II 1G EEX ia IIC T4/T6
- FM Class I Div. 2, in combination with the Liquiline M CM42 and Mycom S CPM153 transmitters

CPS91D
- ATEX II 1G EEX ia IIC T4/T6
- FM / CSA Class I Div. 2, in combination with the Liquiline M CM42 and Mycom S CPM153 transmitters

Note!
Ex versions of digital sensors with Memosens technology are indicated by an orange-red ring in the plug-in head.

TÜV certificate

TOP68 plug-in head
Pressure resistance 16 bar [232 psi], min. triple overpressure safety

Memosens plug-in head
Pressure resistance 16 bar [232 psi], min. triple overpressure safety

EMC compatibility of CPS91D

Accessories

Note!
In the following sections, you find the accessories available at the time of issue of this documentation. For information on accessories that are not listed here, please contact your responsible service.

Transmitters

Liquiline M CM42
- Modular two-wire transmitter, stainless steel or plastic, field or panel instrument,
- various Ex approvals (ATEX, FM, CSA, Nepsi, TIIS),
- HART, PROFIBUS or FOUNDATION Fieldbus available
- Ordering acc. to product structure, see Technical Information [TI381C/24/ae]

Liquisys M CPM223/253
- Transmitter for pH and ORP, field or panel-mounted housing,
- HART or PROFIBUS available
- Ordering acc. to product structure, see Technical Information [TI194C/24/ae]

Mycom S CPM153
- Transmitter for pH and ORP, one or two channel version, Ex or non-Ex,
- HART or PROFIBUS available
- Ordering acc. to product structure, see Technical Information [TI233C/24/ae]

Assemblies (selection)

- Cleanfit W CPA450
  Manually operated retractable assembly, for installation of 120 mm (4.72") pH/ORP electrodes in tanks and pipes;
  Ordering acc. to product structure, see Technical Information [TI183C/24/ae]
  (Make sure to order the correct inner tube for your electrode version.)
- Cleanfit P CPA471
  Compact retractable stainless steel assembly, for the installation in tanks and pipes, manual or pneumatic operation;
  Ordering acc. to product structure, see Technical Information [TI217C/24/ae]
- Cleanfit P CPA472
  Compact retractable plastic assembly, for the installation in tanks and pipes, manual or pneumatic operation;
  Ordering acc. to product structure, see Technical Information [TI223C/24/ae]
- Cleanfit P CPA472D
  Robust retractable assembly for pH, ORP and other industry sensors, manual or pneumatic operation, heavy-duty version;
  Ordering acc. to product structure, see Technical Information [TI403C/24/ae]
- **Cleanfit P CPA473**
  Retractable stainless steel process assembly, with ball valve for a particularly safe and reliable separation of the medium from the environment;
  Ordering acc. to product structure, see Technical Information (TI344C/24/ae)

- **Cleanfit P CPA474**
  Retractable plastic process assembly, with ball valve for a particularly safe and reliable separation of the medium from the environment;
  Ordering acc. to product structure, see Technical Information (TI345C/24/ae)

- **Dipfit W CPA111**
  Plastic immersion and installation assembly, for open and closed tanks;
  Ordering acc. to product structure, see Technical Information (TI112C/24/ae)

- **Dipfit P CPA140**
  Immersion assembly for pH/ORP electrodes for demanding processes;
  Ordering acc. to product structure, see Technical Information (TI178C/24/ae)
- Flowfit P CPA240
  Flow assembly for pH/ORP, for demanding processes;
  Ordering acc. to product structure, see Technical Information [TI179C/24/ae]
- Flowfit W CPA250
  Flow assembly for pH and ORP measurement
  Ordering acc. to product structure, see Technical Information [TI041C/24/ae]
- Ecofit CPA640
  Process connection adapter and cable set for 120 mm (4.72") pH/ORP electrodes with TOP68 plug-in head;
  Ordering acc. to product structure, see Technical Information [TI264C/24/ae]

### Buffer solutions

**High-quality buffer solutions of Endress+Hauser**
The secondary buffer solutions have been referenced to primary reference material of the PTB (German Federal Physico-technical Institute) and to standard reference material of NIST (National Institute of Standards and Technology) according to DIN 19266 by a DKD (German Calibration Service) accredited laboratory.
