Technical Information

Memosens measuring cable and installation accessories

CYK10 / CYK11

Application

Measuring cable for all Memosens sensors and sensors with Memosens technology for nearly all parts of process engineering.

- The Memosens data cable CYK10 is used with sensors utilizing the contactless inductive signal transmission.
- The Memosens extension cable CYK11 is used for the connection of digital fixed-cable sensors with Memosens protocol. The following versions are available: Ferrule with ferrule, M12 female connector with ferrule and M12 female connector with M12 plug. CYK10 based installations can also be extended with CYK11.
- CYK10 and CYK11 can be extended with junction boxes.
- CYK10 available in versions for use in hazardous areas

Your benefits

- Memosens data cable CYK10
  - Absolute waterproof connection (ingress protection IP 68)
  - No corrosion of contacts
  - No influence of interfering potentials thanks to galvanic isolation of transmitter and medium
- Memosens extension cable CYK11
  - Absolute waterproof connection (ingress protection IP 68)
  - Flexible and fast in application
Function and system design

Measuring system

1. Transmitter
2. Memosens extension cable CYK11 (optional)
3. Junction box (optional)
4. Memosens data cable CYK10 or fixed cable
5. Sensor

Memosens

Memosens makes your measuring point safer and more reliable:
- Non-contact, digital signal transmission enables optimum galvanic isolation
- No contact corrosion
- Completely watertight
- Laboratory sensor calibration possible, thus increasing measured value availability
- Predictive maintenance thanks to recording of sensor data, e.g.:
  - Total hours of operation
  - Hours of operation with very high or very low measured values
  - Hours of operation with high temperatures
  - Number of steam sterilizations
  - Sensor condition
It is not allowed to use CYK11 as an extension for CYK10-based measuring system in hazardous areas. For hazardous areas it is recommended to use continuous and not extended Memosens measuring cable CYK10.

Degree of protection

- Memosens data cable CYK10: IP 68 (Memosens: 1 bar (15 psi), 25 °C (77 °F), 1 mol/l KCl, 45 days; M12: 0.1 bar (2 psi), 50 °C (131 °F), 3 mol/l KCl, 30 days)
- Memosens extension cable CYK11: IP 68 (M12: 0.1 bar (2 psi), 50 °C (131 °F), 3 mol/l KCl, 30 days) in mated condition

Mechanical construction: Measuring cable for digital sensors

Instead of GY you can also ground over the cable clamp in the transmitter.

Ordering information

Product structure

You can create a valid and complete order code using the Endress + Hauser Configurator tool on the Internet. Enter the following addresses in your browser to access the relevant product page:
www.products.endress.com/cyk10
www.products.endress.com/cyk11

1. The following options are available on the right-hand side of the page:

<table>
<thead>
<tr>
<th>Product page function</th>
</tr>
</thead>
<tbody>
<tr>
<td>:: Add to product list</td>
</tr>
<tr>
<td>:: Price &amp; order information</td>
</tr>
<tr>
<td>:: Compare this product</td>
</tr>
<tr>
<td>:: Configure this product</td>
</tr>
</tbody>
</table>

2. Select “Configure this product”.
3. A new window opens with the Configurator. Using this tool, you can configure your device and you will receive a valid and complete order code for this.
4. Then export the order code as a PDF or as an Excel file selecting from the buttons provided at the top of the page.
