Technical Information

Condumax W CLS15 and CLS15D

Conductivity sensors, analog or digital with Memosens technology,
Cell constant $k = 0.01 \text{ cm}^{-1}$ or $k = 0.1 \text{ cm}^{-1}$

Application

Measurement in pure and ultrapure water:
- Monitoring ion exchangers
- Reverse osmosis
- Distillation
- Chip cleaning

The measuring range of the sensors depends on the cell constant $k$:
- $k = 0.01 \text{ cm}^{-1}$: 0.04 to 20 $\mu$S/cm
- $k = 0.1 \text{ cm}^{-1}$: 0.1 to 200 $\mu$S/cm

Sensors with a temperature sensor are used together with conductivity transmitters equipped with automatic temperature compensation:
- Liquiline M CM42
- Mycom S CLM153
- Liquisys M CLM223/253

For measurement of resistivity, $\text{M} \Omega \cdot \text{cm}$ measuring ranges are available in the menus of these transmitters.

Your benefits

- High measuring accuracy as cell constant is individually measured
- Installation in pipes or flow chambers
- Compact design
- Available with plug-in head or fixed cable
- Easy to clean thanks to polished measuring surfaces
- Can be sterilized up to max. 140°C (284°F)
- Stainless steel 1.4435 (AISI 316L)
- Quality certificate stating the individual cell constant
- Available with inspection certificate according to EN 10204 3.1

Further benefits offered by Memosens technology

- Maximum process safety through contactless inductive signal transmission
- Data safety through digital data transmission
- Easy handling thanks to storage of sensor-specific data
- Predictive maintenance possible thanks to registration of sensor load data
Function and system design

Measuring principle

Conductive measurement of conductivity

The conductivity of liquids is measured with the following measurement setup: Two electrodes are immersed in the medium. An AC voltage is applied to these electrodes which generates a current in the medium. The electric resistance or its reciprocal value, the conductance G, is calculated according to Ohm’s law. The specific conductivity κ is determined using the cell constant k that is dependent on the sensor geometry.

![Conductive measurement of conductivity](image)

General properties

- **Electrodes**
  The sensor has two coaxially arranged measuring electrodes made of polished, stainless steel 1.4435 (AISI 316L).

- **Temperature measurement**
  In addition, a temperature sensor is installed in the inside electrode to measure the medium temperature.

- **Installation**
  The sensors are available with various process connections and can be installed directly. For simple installation in cross or T-pieces with DN 32, 40 or 50, adapter couplings (made of PVC for cementing) are available.

- **Durable and sterilizable**
  - The sensors are pressure-proof up to 12 bar at 20°C (174 psi at 68°F).
  - They are suitable for continuous operation up to 120°C at 1 bar (248°F at 14.5 psi).
  - Short-time sterilization up to 140 °C at 1 bar (284 °F at 14.5 psi) is possible.
  - For CLS15D, the maximum temperature for communication with the transmitter is 130°C (266°F).

Important properties CLS15D

- **Maximum process safety**
  The inductive and non-contacting measured value transmission of Memosens guarantees maximum process safety and offers the following benefits:
    - All problems caused by moisture are eliminated.
    - The plug-in connection is free from corrosion.
    - Measured value distortion from moisture is not possible.
    - The plug-in system can even be connected under water.

- **EMC safety**
  The transmitter is galvanically decoupled from the medium.

Data safety through digital data transfer

The Memosens technology digitalizes the measured values in the sensor and transfers them to the transmitter contactlessly and free from interference potential. The result:

- An automatic error message is generated if the sensor fails or the connection between sensor and transmitter is interrupted.
- The availability of the measuring point is dramatically increased by immediate error detection.
- Application in hazardous areas is unproblematic; the integrated electronics are intrinsically safe.
**Easy handling**

Sensors with Memosens technology have integrated electronics that allow for saving calibration data and further information such as total hours of operation and operating hours under extreme measuring conditions. When the sensor is connected, the calibration data are automatically transferred to the transmitter and used to calculate the current measured value. Storing the calibration data in the sensor allows for calibration and adjustment away from the measuring point. The result:

- Sensors can be calibrated under optimum external conditions in the measuring lab. Wind and weather do neither affect the calibration quality nor the operator.
- The measuring point availability is dramatically increased by the quick and easy replacement of precalibrated sensors.
- Maintenance intervals can be defined based on all stored sensor load and calibration data and predictive maintenance is possible.
- The sensor history can be documented on external data carriers and evaluation programs at any time. Thus, the current application of the sensors can be made to depend on their previous history.

**Communication with the transmitter**

Always connect digital sensors to a transmitter with Memosens technology. Data transmission to a transmitter for analog sensors is not possible.

---

**Data storage of CLS15D**

Digital sensors are able to store the following system data in the sensor.

- **Manufacturing data**
  - Serial number
  - Order code
  - Date of manufacture

- **Calibration data**
  - Calibration date
  - Cell constant
  - Change in cell constant
  - Number of calibrations
  - Serial number of the transmitter used for the last calibration

- **Application data**
  - Temperature application range
  - Conductivity application range
  - Date of first commissioning
  - Maximum temperature value
  - Operating hours at temperatures above 80°C / 120°C (176°F / 248°F)
  - Number of sterilizations
**Measuring system**

A complete measuring system comprises:
- a CLS15 or CLS15D conductivity sensor
- a transmitter, e.g. Liquiline M CM42
- a measuring cable, e.g. CYK71 or CYK10 Memosens data cable

**Input**

**Measured values**
- Conductivity
- Temperature

**Cell constant k**
- Depending on ordered version:
  - $k = 0.01 \text{ cm}^{-1}$
  - $k = 0.1 \text{ cm}^{-1}$

**Measuring ranges**

<table>
<thead>
<tr>
<th>Conductivity measurement</th>
<th>CLS15: -20 to 140°C (-4 to 284°F)</th>

<td>0.1 μS/cm to 200 μS/cm</td>
</tr>
</tbody>
</table>

(then the following temperature range

CLS15: -20 to 140°C (-4 to 284°F)

CLS15D: -20 to 100°C (-4 to 212°F)

(spec. measuring accuracy up to 100°C / 212°F, communication up to 130 °C / 266 °F)

**Temperature measurement**

CLS15: -20 to 140°C (-4 to 284°F)

CLS15D: -20 to 100°C (-4 to 212°C)

(spec. measuring accuracy up to 100°C / 212°F, communication up to 130 °C / 266 °F)

**Temperature sensor**

CLS15: Pt 100 Class A according to DIN IEC 751

CLS15D: NTC
Cable specification

**CLS15**

CLS15 is connected to the transmitter using the special measuring cable CYK71 or CYK71-Ex or the fixed cable.

![Special measuring cable CYK71 / CYK71-Ex or fixed cable](image)

**CLS15D**

CLS15D connected to the transmitter using the special measuring cable CYK10.

![Special measuring cable CYK10](image)

**Performance characteristics**

**Maximum measured error**

Each individual sensor is factory measured in a solution of approx. 5 μS/cm for cell constant 0.01 cm⁻¹ or approx. 50 μS/cm for cell constant 0.1 cm⁻¹ on a reference measuring system referred to NIST or DKD. The accurate cell constant is entered in the supplied quality certificate. The maximum measured error in cell constant determination is 1.0%.

**Installation**

**Installation instructions**

The sensors are mounted directly via the thread NPT ½" or ¾" or clamp 1-½" process connections. Optionally, the sensor can be installed in cross or T-pieces or in a flow chamber.

![CLS15 with NPT ½" process connection installed in commonly used T- or cross piece](image)

</tbody>
</table>
The measuring surfaces of the sensor must be completely immersed in the medium during operation. Minimum immersion depth is 32 mm (1.26”).
When working in ultrapure water, ingress of air must be prevented since dissolved air, particularly CO₂, may increase conductivity by up to 3 μS/cm.

Accessories

Installation
For sensors with NPT ½" process connection (CLS15-x1Axx):

Threaded couplings
PVC-threaded coupling
- For cementing in standard PVC cross or T-pieces with DN 20
- With G ½ internal thread, self-sealing with ½" NPT sensor thread
- Order no. 50066536
PVDF-threaded coupling
- With G ½ internal thread and G 1 external thread
- Pressure-proof up to 12 bar at 20°C (174 psi at 68°F), max. temperature 120°C at 1 bar (248°F at 14.5 psi), incl. O-ring
- Internal thread, self-sealing with NPT ½" sensor thread
- Order no. 50004381

Equalizing sleeves
PVC equalizing sleeves AM
- For adaptation of the PVC-threaded coupling to larger nominal diameters
Diameters, order numbers:
- AM 32: for installation into cross or T-pieces DN 32, order no. 50004738
- AM 40: for installation into cross or T-pieces DN 40, order no. 50004739
- AM 50: for installation into cross or T-pieces DN 50, order no. 50004740

Flow assemblies
Flow assembly
- For installation of conductivity sensors with NPT ½" thread
- Material: stainless steel 1.4404 (AISI 316 L)
- Inlet and outlet: 90°, Ø 6 mm (0.24")
- Volume: 0.69 l (0.18 US gal)
- Max. temperature: 100°C (212°F)
- Max. pressure: 16 bar (232 psi)
- Order no.: 71042405

Connection | Measuring cables

**CYK81 measuring cable**
- Non-terminated measuring cable for extension of sensor cables of e.g. Memosens, CUS31/CUS41
- 2 wires, twisted pair with shield and PVC-sheath (2 x 2 x 0.5 mm² + shield)
- Sold by the meter, order no. 51502543
Junction boxes

Junction box VBM
- For cable extension
- 10 terminals
- Cable entries: 2 x Pg 13.5 or 2 x NPT ½"
- Material: aluminum
- Ingress protection: IP 65 (NEMA 4X)
- Order numbers:
  - cable entries Pg 13.5: 50003987
  - cable entries NPT ½": 51500177

Junction box VBM-Ex
- For cable extension in hazardous areas
- 10 terminals (blue)
- Cable entries: 2 x Pg 13.5
- Material: aluminum
- Ingress protection: IP 65 (NEMA 4X)
- Order no.: 50003991

Junction box RM
- For cable extension (e.g. for Memosens sensors or CUS31/CUS41)
- 5 terminals
- Cable entries: 2 x Pg 13.5
- Material: PC
- Ingress protection: IP 65 (NEMA 4X)
- Order no.: 51500832

Transmitters

Liquiline M CM42 (for analog conductivity sensors and digital conductivity sensors with Memosens technology)
- Modular two-wire transmitter for Ex and non-Ex areas
- Hart®, PROFIBUS or FOUNDATION Fieldbus available
- Ordering acc. to product structure, see Technical Information (TI381C/24/ae)

Liquisys M CLM223/253 (for analog conductivity sensors)
- Transmitter for conductivity, field or panel-mounted housing,
- Hart® or PROFIBUS available
- Ordering acc. to product structure, see Technical Information (TI193C/24/ae)

Mycom S CLM153 (for analog conductivity sensors)
- Transmitter for conductivity, one or two channel version, Ex or Non-Ex,
- Hart® or PROFIBUS available
- Ordering acc. to product structure, see Technical Information (TI234C/24/ae)

Calibration solutions

Precision solutions referred to SRM (Standard Reference Material) of NIST for qualified calibration of conductivity measuring systems according to ISO, with temperature table,
- CLY11-A
  74 µS/cm (reference temperature 25°C (77°F)), 500 ml (16.9 fl.oz); order no. 50081902
- CLY11-B
  149.6 µS/cm (reference temperature 25°C (77°F)), 500 ml (16.9 fl.oz); order no. 50081903
Calibration sets

Concal calibration set
- Conductivity calibration set for ultrapure water applications
- Complete, factory-calibrated measuring set with certificate, traceable to SRM of NIST and DKD
- For comparative measurement in ultrapure water applications up to max. 10 µS/cm
- Order numbers, versions:
  - 230 V AC: 50083777
  - 115 V AC: 50083778

Recalibration Concal
- Factory recalibration and new issue of calibration certificate, traceable to SRM of NIST and DKD
- Factory calibration procedure according to ASTM D-5391-93
- Order no. 5150248
