1  Important document information

1.1  Document function

These Operating Instructions contain all the information that is required in various phases of the life cycle of the device: from product identification, incoming acceptance and storage, to mounting, connection, operation and commissioning through to troubleshooting, maintenance and disposal.

1.2  Document conventions

1.2.1  Safety symbols

<table>
<thead>
<tr>
<th>Symbol</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>![DANGER]</td>
<td>DANGER! This symbol alerts you to a dangerous situation. Failure to avoid this situation will result in serious or fatal injury.</td>
</tr>
<tr>
<td>![WARNING]</td>
<td>WARNING! This symbol alerts you to a dangerous situation. Failure to avoid this situation can result in serious or fatal injury.</td>
</tr>
<tr>
<td>![CAUTION]</td>
<td>CAUTION! This symbol alerts you to a dangerous situation. Failure to avoid this situation can result in minor or medium injury.</td>
</tr>
<tr>
<td>![NOTICE]</td>
<td>NOTE! This symbol contains information on procedures and other facts which do not result in personal injury.</td>
</tr>
</tbody>

2 Safety instructions

2.1 Requirements for the personnel

The personnel for installation, commissioning, diagnostics and maintenance must fulfill the following requirements:

- Trained, qualified specialists must have a relevant qualification for this specific function and task
- Are authorized by the plant owner/operator
- Are familiar with federal/national regulations
- Before beginning work, the specialist staff must have read and understood the instructions in the Operating Instructions and supplementary documentation as well as in the certificates (depending on the application)
- Following instructions and basic conditions

The operating personnel must fulfill the following requirements:

- Being instructed and authorized according to the requirements of the task by the facility's owner-operator
- Following the instructions in these Operating Instructions

2.2 Designated use

The Soliswitch FTE20 must only be used as a point level switch for specific bulk solids (see Technical Data) → 24.

- The device may only be operated when installed.
- The manufacturer accepts no liability for damages resulting from incorrect use or use other than that designated. It is not permitted to convert or modify the device in any way.
2.3 Workplace safety
For work on and with the device:
- Wear the required personal protective equipment according to federal/national regulations.

2.4 Operational safety
Risk of injury!
- Operate the device in proper technical condition and fail-safe condition only.
- The operator is responsible for interference-free operation of the device.

Conversions to the device
Unauthorized modifications to the device are not permitted and can lead to unforeseeable dangers.
- If, despite this, modifications are required, consult with Endress+Hauser.

3 Identification

3.1 Nameplate

🔍 1 Nameplate of the Soliswitch FTE20 (example)

1 Order code
2 Serial number
3 Extended order code
4 Power supply and IP protection of the housing
5 Ambient temperature range
6 Approvals
7 Output
8 Year of manufacture and manufacturer's address
3.2 Certificates and approvals

An overview of all the approvals available is provided in the "Technical data" section → 27.

**CE mark, Declaration of Conformity**

The device is designed to meet state-of-the-art safety requirements, has been tested, and left the factory in a condition in which it is safe to operate. The device complies with the applicable standards and regulations in accordance with EN 61010-1 "Safety requirements for electrical equipment for measurement, control and laboratory use".

The device described in these Operating Instructions therefore complies with the statutory requirements of the EU Directives. The manufacturer confirms that the device has been successfully tested by applying the CE mark.

4 Installation

4.1 Incoming acceptance, transport, storage

Compliance with the permitted environmental and storage conditions is mandatory. Precise specifications are provided in the "Technical data" section → 20.

4.1.1 Incoming acceptance

On receipt of the goods, check the following points:

- Is the packaging or the content damaged?
- Is the delivery complete? Compare the scope of delivery against the information on your order form.

4.1.2 Transport and storage

Please note the following:

- Pack the device so that is protected against impact for storage and transport. The original packaging provides optimum protection.
- The permitted storage temperature is –20 to 60 °C (–4 to 140 °F).

4.2 Installation conditions

Correct and incorrect installation positions are indicated in → 2, 9.

The device must be protected against direct sunshine. A weather protection cover is available as an accessory, see the "Accessories" section → 28.

The dimensions of the device are provided in the "Technical data" section → 16, 25.
2 Orientations of the point level switch, dimensions in mm (in)

<table>
<thead>
<tr>
<th>Permitted orientations</th>
<th>Forbidden orientations</th>
</tr>
</thead>
<tbody>
<tr>
<td>1: Vertical from the top</td>
<td>6: In direction of solids flow</td>
</tr>
<tr>
<td>2: Angled from the top</td>
<td>7: Installation coupling too long</td>
</tr>
<tr>
<td>3: From the side</td>
<td>8: Horizontal with shaft length &gt;300 mm (11.8 in)</td>
</tr>
<tr>
<td>4: From the side with protective cover against falling solids</td>
<td></td>
</tr>
<tr>
<td>5: From the bottom (device must be protected against shock-type loads)</td>
<td></td>
</tr>
</tbody>
</table>

**Ambient temperature range**
-20 to 60 °C (–4 to 140 °F)

**Medium temperature range**
-20 to 80 °C (–4 to 176 °F)

**Mechanical load of optional signal lamp**
The optional signal lamp must be protected against mechanical load (impact energy > 1 J).

More information is provided in the "Technical data" section → 23.

### 4.3 Installation instructions

**NOTICE**
The device can be damaged if handled incorrectly during installation

- Do not turn the housing to tighten the process connection. Once the process connection has been tightened, the housing can be aligned so that the cable entries point downwards.
3 Installation of the standard version
1 Sealing ring 60x48x3 mm (2.36x1.89x0.12 in.)
2 Open-ended wrench AF 60

NOTICE
The device with hinged rotating paddle does not function correctly when the transport lock is secured.
- Remove the transport lock (plastic net around the rotating paddle) prior to installation.

4 Installation of the version with the hinged rotating paddle
1 Sealing ring
2 Open-ended wrench AF 60
4.3.1 Turning the housing to the right position

Correct housing position

4.3.2 Installation of the flange version

The flange version is available as an accessory. The dimensions are provided in the "Technical data" section → 29.

Installation of the flange version

1. Process seal
2. Nut
3. Screws (not included in the delivery)
4.3.3 Mounting the weather protection cover

The weather protection cover is available as an accessory and can be installed without disassembling the point level switch. The dimensions are provided in the "Technical data" section → 19, 29.

To protect the device from sunlight, arrange the weather protection cover in such a way that provides optimum shade for the device.

4.3.4 Installation in hazardous areas

When installing the point level switch in a hazardous area, the securing screw must be tightened to prevent the cover from opening.

Additional installation instructions for the hazardous area are provided in the separate Ex documentation for the device (optional).
4.4 Post-installation check
- Are the seals undamaged?
- Is the process connection securely tightened?
- Do the cable entries point downwards and are they tightened?
- Is the cover securely closed and the securing screw securely tightened?

5 Wiring

5.1 Connection instructions

⚠️ WARNING
Danger! Electric voltage!
- The entire connection of the device must take place while the device is de-energized.

⚠️ CAUTION
Pay attention to additional information provided
- The protective ground conductor must be connected before any other connection is established.
- Before commissioning the device, make sure that the supply voltage matches the voltage specifications on the nameplate.
- Provide a suitable switch or power-circuit breaker in the building installation. This switch must be provided close to the device (within easy reach) and marked as a circuit breaker.
- An overload protection element (rated current ≤ 10 A) is required for the power cable.

⚠️ NOTICE
High temperatures can damage the cables and the device.
- Use cables that are suitable for temperatures 10 °C (18 °F) above the ambient temperature.

⚠️ NOTICE
No protection class IP66 when using the protective caps for cable entries provided with the device.
- The protective caps provided with the device are only for protection against pollution during transport and storage. When operating the device, close unused cable entries with a suitable blind plug.

😊 If replacing an older Soliswitch FTE3x with a new FTE20-type device, note that the free ends of the cable to the terminal are longer than in the older version (approx. 5 to 6 cm (1.97 to 2.36 in)).
5.2 Quick wiring guide

</tbody>
</table>

## 6 Operation

**WARNING**

The device is not explosion-protected if the housing is open.

- The device may only be opened in the hazardous area if no supply voltage is applied. Therefore the device may only be operated in a de-energized state or outside the hazardous area.

### 6.1 Setting the switching threshold (sensitivity)

The switching threshold can be adapted to the weight of the bulk solids in 3 stages via an operating element that is accessible from above. The threshold can also be set during operation (in the non-hazardous area):

- Minimum: 80 g/l (4.99 lb/ft³)
- Depending on the density of the bulk solids adjustable in three stages: low, medium (default), high

### Setting the switching threshold

1. Move the operating element counterclockwise as illustrated in the graphic.
2. Move the operating element to the desired position and let it click into place.
6.2  Rotational movement display
The shaft's rotational movement is displayed by a ratchet disk fitted on the drive axle of the paddle. The viewing area is lit up by an LED to make it easier to see. The rotational movement of the disk, and therefore also the shaft, can be checked through an inspection opening in the cover of the internal compartment when the cover is closed.

![Inspection glass to observe rotational movement](image)

6.3  Indicator light (optional)
The point level switch is optionally fitted with an indicator light that lights up when the rotating paddle stops.

6.4  Testing the internal switch
When the housing cover is open, the function of the internal switch to switch off the motor can be checked by inserting a screwdriver into the opening provided in the electronics cover and by moving the handle in the direction of the arrow.

![Testing the internal switch](image)
7 Commissioning

7.1 Post-installation and post-connection check

Checklists:
- Post-installation check →  13
- Post-connection check →  16

7.2 Setting the switching pressure

The switching threshold can be adapted to the weight of the bulk solids in 3 stages via an operating element that is accessible from above (also possible during operation):
- Minimum: 80 g/l (4.99 lb/ft³)
- Depending on the density of the bulk solids adjustable in three stages: low, medium (default), high

7.3 Switching on the device

The shaft starts to turn as soon as the supply voltage is switched on. The rotational movement can be observed from the outside.

![Diagram](A0017793)

15 Window to observe rotational movement

8 Troubleshooting

Functional testing of the point level switch by testing the internal switch →  14,  18
## 8.1 Point level switch with rotation monitoring

The table below shows the output signal of the point level switch with rotation monitoring for overfill protection.

### Rotation monitoring of the point level switch (optional)

<table>
<thead>
<tr>
<th>Normal operation</th>
<th>Power supply</th>
<th>Motor</th>
<th>Output signal of &quot;full&quot; sensor</th>
<th>Internal light</th>
</tr>
</thead>
<tbody>
<tr>
<td>On</td>
<td>On</td>
<td>Shaft turns</td>
<td>-</td>
<td>On</td>
</tr>
<tr>
<td>On</td>
<td>Shaft does not turn, rotating paddle is covered</td>
<td>Full</td>
<td>On</td>
<td></td>
</tr>
</tbody>
</table>

| Event of fault   | On           | Shaft does not turn, rotating paddle is not covered | Full | Flashes |
| Off             | Full         | Off | |

If the rotation monitoring system detects an error, a "full" alarm is signaled and the light in the electronics housing flashes.

### Function testing of the point level switch

Operate the internal switch

1. Insert a screwdriver or another suitable tool in the opening provided in the electronics cover and move it in the direction indicated, see testing the internal switch → § 14, § 18.
   → The switch is operated and the empty/full alarm is reset.

2. Wait for the error detection time to elapse (approx. 25 s).
   ← If no rotational movement is detected during the error detection time, the device signals the full or empty alarm again and the light in the electronics housing flashes.

## 9 Technical data

### 9.1 Input

#### 9.1.1 Measured variable

Level (in line with the orientation and length)

#### 9.1.2 Measuring range

The measuring range depends on the installation location of the device and the selected length of the shaft 75 to 300 mm (2.95 to 11.81 in) or the rope extension up to max. 2000 mm (6.56 ft).
9.2 Output

9.2.1 Output signal
Binary

9.2.2 Switching output

Function
Switch a floating changeover contact.

Switching behavior
On/off

Response time
From standstill of the paddle until output of the switching signal: 20°, correponds to 3.5 s

Switching capacity
- EN 61058: 250 V AC 5E4, 6(2) A
- UL 1054: 125 to 250 V AC, 5 A
- 30 V DC, 8 A
- Min. switching load 300 mW (5 V/5 mA)

After actuating of a current >100 mA the switching function with a switching current I <100 mA cannot be guaranteed.

9.3 Power supply

9.3.1 Terminal assignment

<table>

In direction of solids flow
### 9.5.2 Special mounting instructions

**Side load on the shaft**  
Max. 60 N

**Load on the rope**  
Max. 1500 N

**Operating pressure (abs.)**  
0.5 to 2.5 bar (7.25 to 36.3 psi)

**Housing can be rotated 360°**  
To adjust to the direction of the cable entries (pointing downwards)

**Cable entries**  
The dust protection plugs which are delivered with the device are only for protection during transport and storage. Close unused cable entry with a blind plug (IP65) when commissioning the device.

**Mechanical load of optional signal lamp**  
The optional signal lamp must be protected against mechanical load (impact energy > 1 J).

### 9.6 Environment

The device must be protected against direct sunshine.

A weather protection cover is available as an accessory, see the "Accessories" section → 28.

All values not indicated as per DIN EN 6054-1.

**9.6.1 Ambient temperature range**  
-20 to 60 °C (-4 to 140 °F)

**9.6.2 Storage temperature**  
-20 to 60 °C (-4 to 140 °F)

**9.6.3 Climate class**  
EN60654-1, Class C2

**9.6.4 Degree of protection**  
IP66

**9.6.5 Shock resistance**  
as per EN 60068-2-27: 30g
9.6.6 Vibration resistance
as per EN 60068-2-64: 0.01g²/Hz

9.6.7 Electromagnetic compatibility
Electromagnetic compatibility in accordance with all the relevant requirements of the EN 61326 series. For details refer to the Declaration of Conformity.
- Interference immunity: as per IEC 61326-1, industrial environment
- Interference emission: as per IEC 61326-1, Class B

9.6.8 Electrical safety
As per IEC 61010-1
Class I equipment, overvoltage category II, pollution degree 2

9.6.9 Altitude
< 2,000 m (6,560 ft) over MSL

9.7 Process

9.7.1 Medium temperature range
-20 to 80 °C (–4 to 176 °F)

9.7.2 Process pressure range
≤ 1.5 bar (21.8 psi) overpressure (e.g. when silo is filled)

9.7.3 Solids weight
≥ 80 g/l (4.99 lb/ft³)

9.7.4 Grain size
≤ 50 mm (1.97 in)
9.8 Mechanical construction

9.8.1 Design, dimensions

16 Dimensions of the point level switch, dimensions in mm (in)

1 Indicator light (optional)
2 Version with rope extension
17 Dimensions of the rotating paddle - standard and hinged, for shaft and rope extension, dimensions in mm (in)

<table>

### 9.8.4 Cable entries
2 x cable gland, M20 x 1.5
(optionally 1 x cable gland M20 x 1.5 and indicator lamp)
Permitted cable diameter
5 to 9 mm (0.2 to 0.35 in)

### 9.9 Operability

#### 9.9.1 Local operation
**Rotational movement display**
The shaft's rotational movement is displayed by a reflector disk fitted on drive shaft of the paddle and can be monitored through a sight opening in the drive/terminal cover. The disk's viewing area is lit up by an LED to make it easier to see.
If rotation monitoring (optional) detects an error, the LED flashes.

**Setting the switching threshold (sensitivity)**
The switching threshold can be adapted to the weight of the bulk solids in 3 stages via an operating element that is accessible from above (also possible during operation):
- Minimum: 80 g/l (4.99 lb/ft³)
- Depending on the density of the bulk solids adjustable in three stages: low, medium (default), high

### 9.10 Certificates and approvals

#### 9.10.1 CE mark
The measuring system meets the legal requirements of the EU Directives. Endress+Hauser confirms that the device has been successfully tested by applying the CE mark.

#### 9.10.2 Ex approval
Information about currently available Ex versions (ATEX, FM, CSA, etc.) can be supplied by your E+H Sales Center on request. All explosion protection data are given in a separate documentation which is available upon request.
9.10.3 Other standards and guidelines

- IEC 60529:
  Degrees of protection provided by enclosures (IP code)
- IEC 61010-1: 2001 cor 2003
  Safety requirements for electrical equipment for measurement, control and laboratory use
- IEC 61326 series:
  Electromagnetic compatibility (EMC requirements)
- Climate class as per EN60654-1, Class C2

9.11 Accessories

Various accessories, which can be ordered with the device or subsequently from Endress +Hauser, are available for the device. Detailed information on the order code in question is available from your local Endress+Hauser sales center or on the product page of the Endress +Hauser website: [www.endress.com](http://www.endress.com).
