Function and system design

Function
The Field Xpert SMT70 tablet PC for universal device configuration supports protocols such as HART, PROFIBUS DP/PA, FOUNDATION Fieldbus, Modbus, and Endress+Hauser service protocols (CDI, ISS, IPC and PCP). The devices can be connected directly via a suitable interface e.g. a modem (point-to-point) or a bus system (point-to-bus). The Field Xpert software package is fast, easy and intuitive to use. The Field Xpert device library has more than 2,700 pre-installed device and communication drivers. They can be used to operate practically all HART and FOUNDATION Fieldbus devices (FieldComm Group libraries). Furthermore all Endress+Hauser field device drivers are installed. Further device drivers (DTMs) can be installed additionally. The generic HART DTM and PROFIBUS profile DTMs also enable operation of all the important basic functionality of the relevant field devices.
The following modems/interfaces are supported by the Field Xpert SMT70 tablet PC:

- **HART**
  - Commubox FXA195 (4 to 20 mA)
  - MACTek Bluetooth modem (4 to 20 mA)
  - Memograph RSG45 (4 to 20 mA)
  - MACTek USB modem (4 to 20 mA)

- **PROFIBUS**
  - Softing PROFibus
  - Softing PBpro USB
  - Fieldgate SFG500

- **FOUNDATION Fieldbus**
  - NI USB
  - Softing FFusb

- **Modbus**
  - Modbus serial

- **WirelessHART**
  - Wireless HART adapter SWA70

- **Endress+Hauser service interfaces**
  - Commubox FXA291
  - Commubox FXA193
  - TXU10 V2
  - TXU10 V1
  - CDI USB
  - CDI TCP/IP

**HART point-to-point connection via Commubox FXA195**

This diagram shows a HART point-to-point connection with an FXA195 USB/HART modem. If an FXA195 is connected to the computer, the Field Xpert SMT70 tablet PC can connect to the device automatically.
To establish communication with the HART device, a resistor of at least 250 Ω must be provided in the circuit. The way in which this is done depends upon the system architecture and power source used. Please read the FXA195 manual carefully.

**PROFIBUS point-to-bus connection**

This diagram shows how the connection from PROFIBUS DP to PROFIBUS PA can be established using a Siemens DP/PA Link or a Pepperl+Fuchs SK3.

CDI point-to-point connection

This diagram shows a CDI point-to-point connection with a Commubox FXA291 interface. If this Commubox is connected to the computer, the Field Xpert SMT70 tablet PC can connect to the device automatically.
